

TECHNOVATION

Chapter Ambassador

Thank you for serving as a Chapter Ambassador for the Technovation Girls 2025/2026 season. Because of leaders like you, more than 30,000 builders worldwide created real solutions this year.

You brought Technovation Girls to your community and supported the teams who built applications and AI tools for the people around them. You created a local hub where builders found their peers, their mentors, and the confidence to build something real.

The work is demanding. We know it often meant project management, resource coordination, team leadership, and strategic decisions, often in the same week. You did it, and the proof is in what your community built this season.

We are honored to be part of your journey, and we hope this is just the beginning.

Thank you.

Tara Chklovski, Technovation Founder & CEO

Building innovators *for life*
